REASONS FOR ALLOWANCE

9. The following is an examiner’s statement of reasons for allowance:

The cited prior art taken alone or in combination fail to teach, in combination with the other claimed limitations, comparing code operable to compare an XML data representation of said program configuration data with data defining valid program configuration data; wherein, if said XML data representation does match said data defining valid program configuration data, then triggering code is operable to trigger a valid program configuration response; ... wherein said comparing code is executable by a program configuration managing computer and said valid program configuration response comprises sending validated program configuration data to a

managed computer for use by said managed computer; wherein said validated program configuration data is sent from said program configuration managing computer to said managed computer as said XML data representation as substantially recited in independent claims 1, 16 and 31.

The closest cited prior arts, the combination of Hammack (U.S. 6,449,624) and Berg (U.S. 6,745,208) teaches a method of validating program configuration data. However, the combination of Hammack (U.S. 6,449,624) and Berg (U.S. 6,745,208) fails to teach comparing code operable to compare an XML data representation of said program configuration data with data defining valid program configuration data; wherein, if said XML data representation does match said data defining valid program configuration data, then triggering code is operable to trigger a valid program configuration response; ... wherein said comparing code is executable by a program configuration managing computer and said valid program configuration response comprises sending validated program configuration data to a managed computer for use by said managed computer; wherein said validated program configuration data is sent from said program configuration managing computer to said managed computer as said XML data representation as substantially recited in independent claims 1, 16 and 31; and as pointed out by the applicant's remarks/arguments on pg. 9, par. 4 to pg. 14, par. 2.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
